

# CBSE Class 10 Mathematics - Answer Key

---

1. The discriminant of the quadratic equation  $3x^2 - 4x + 1 = 0$  is

**Answer:** (C)

**Solution:**

1. Identify  $a = 3$ ,  $b = -4$ , and  $c = 1$ .
2. Use  $D = b^2 - 4ac$ .
3. So  $D = (-4)^2 - 4(3)(1) = 4$ .

**Derivation:**  $D = b^2 - 4ac$   
 $D = 16 - 12 = 4$
