

CBSE Class 10 Mathematics - Answer Key

1. 1. Solve $x^2 - 5x + 6 = 0$.

Answer:

$$x = 2 \text{ or } x = 3$$

Solution:

1. Factor $x^2 - 5x + 6$ as $(x - 2)(x - 3)$.
2. Set each factor equal to zero.

Derivation:

$$x^2 - 5x + 6 = (x - 2)(x - 3)$$
